

# Import of patents from Espacenet

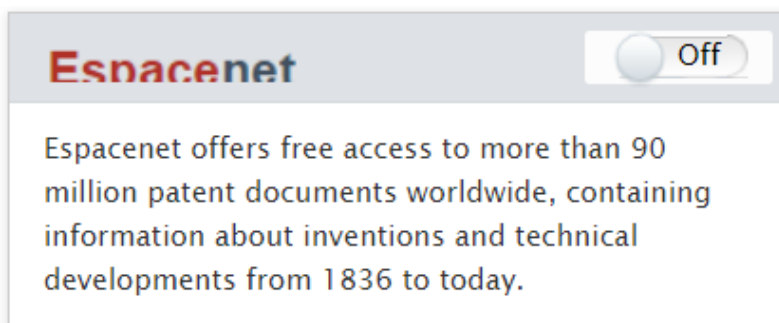

In Pure, you can set up an automated search in Espacenet for patents where you are recorded as inventor. Retrieved patents are presented as candidates that you can accept and import.

The system conducts an automated search once a week. It is also possible to conduct an automated search as a one-time task.

[Watch the video guide on how to create a recurrent automated search in Pure](#)

How to set up an automated search in Espacenet:

- Open your personal tab in Pure and click on "Edit profile" at the top. The personal edit window with your current information will open.
- Click on the tab "automated search" in the left navigation pane.
- Next to the source "Espacenet" switch from "off" to "on" if you want to activate the automated search.

Add name variants

- Click on "Show candidates"
- Select the records you recognize and wish to import
